Clarification received from the Developer:

The Developer vide email dated 27.06.2025 has informed that the item sought for addition is Effluent Treatment Plant with spares and accessories and specifically 600 KLD ETP UF Plant. This ETP UF (Effluent Treatment Plant--Ultra Filtration) is a filtration system that uses a semi permeable membrane to remove contaminants from water. The membrane has microscopic pores ranging from 0.01 to 0.1 microns, more effectively filtering out suspended solids, bacteria, and some viruses.

They have a functional ETP at SEZ Biotech Services Pvt. Ltd., Manjari-Developer. Current function ETP however does not undertake Ultra Filtration which the sought addition will achieve. The UF process effectively enables the recycling of treated water from the ETP using reverse osmosis.
